17	Nut

ASSEMBLY INSTRUCTION

First, assemble the shovel, strengthening beam and wheel frame to the main frame. And then put the handle 12, Annectent and luggage carrier on as shown in the picture, and drive the screws and nuts in. Second, put the axle through the wheel frame and knock the split pin in. Then put the wheels on and insert the pin with its rear opening pin. Last, after adjustment, tighten up the screws.

Put component 14 on and insert handle 16, handle 15. Then drive the screws right into the holes and tighten up the nuts. Then the assembly of the whole cart is finished.
