**BARVY VE SPREJI
CARCOLOR**

www.car-rep.fi

**Porovnání barevného tónu
vozidla s odstínem CarColor**

Maston CarColor má vždy stejný barevný odstín, nikdy žádné variace. Nicméně je třeba si být vědom faktu, že původní barevný odstín vozidla se s jeho věkem mění, povrch se opotřebovává a bledne. Barevný odstín lze obnovit velmi blízko původnímu tónu prostřednictvím lehkého broušení a leštění.

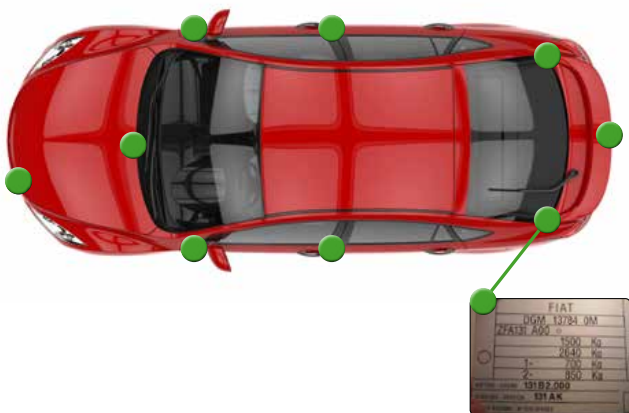

Odstíny Maston CarColor odpovídají originální barvě, díky tomu mohou být tmavší a nebo jasnější než stávající povrch. Barevný rozdíl lze zmenšit rozleštěním nebo jemným broušením po důkladném proschnutí natírané plochy - rozdíl v odstínu mezi novým a starým nátěrem se tak vyrovná. Broušení lze však provádět jen po té, co natíraná plocha zcela zaschne. To může trvat i několik týdnů - v závislosti na okolní teplotě a vlhkosti.

Než začnete aplikovat barvu na vozidlo, proveďte vždy zkoušku na samostatném kusu plechu. Metalické odstíny musí být vždy následně přelakovány čirým lakem CarColor, aby bylo docíleno požadovaného odstínu. Tyto metalické odstíny jsou v seznamu označeny. Za chybu odstínu nepřebíráme odpovědnost.

NAJDĚTE TU SPRÁVNOU BARVU PRO VAŠE AUTO!
